Figure 1 consists of 12 bar charts, each representing a different variable. The x-axis for all charts is divided into four categories: All respondents, Nonusers, Users, and Users who have used the service for 1 year or more. The y-axis represents the percentage of respondents, ranging from 0% to 100%.

- Age:** The distribution is relatively even across all groups, with a slight increase in the 18-24 age group for users.
- Sex:** The distribution is relatively even across all groups, with a slight increase in the male population for users.
- Education:** Users have a higher percentage of respondents with a college degree or higher compared to nonusers.
- Income:** Users have a higher percentage of respondents in the higher income brackets compared to nonusers.
- Marital Status:** The distribution is relatively even across all groups.
- Employment Status:** Users have a higher percentage of respondents who are employed compared to nonusers.
- Health Status:** The distribution is relatively even across all groups.
- Attitude toward Technology:** Users have a higher percentage of respondents with a positive attitude toward technology compared to nonusers.
- Attitude toward the Internet:** Users have a higher percentage of respondents with a positive attitude toward the Internet compared to nonusers.
- Attitude toward the Service:** Users have a higher percentage of respondents with a positive attitude toward the service compared to nonusers.
- Attitude toward the Provider:** Users have a higher percentage of respondents with a positive attitude toward the provider compared to nonusers.
- Attitude toward the Service Provider:** Users have a higher percentage of respondents with a positive attitude toward the service provider compared to nonusers.
